CONVEYOR SYSTEMS

Plastic Modular Conveyors

Plastic Modular Conveyors

The Flexible Choice

The L.A.C. Conveyors range of Plastic Modular Conveyors offers an unparalleled combination of quality, flexibility and value for money. Our conveyors are designed and built to the highest quality standards using some of the toughest and most durable materials available.

A standard 25mm wall thickness ensures that L.A.C. conveyors are built stronger and last longer than those from other suppliers. A full range of colours and finishes ensures that there is an L.A.C. Conveyors product that is ideally suited for your industry and application.

Plastic Modular Conveyors

The Flexible Choice

A conveyor for every application

Fully customisable:

Belt level with the top of the sides or set lower to provide side walls.

Inclines, declines, swan-neck or simple straight lengths.

Belt options - flights, scoops or side walls.

Belt construction - solid or a range of open mesh sizes.

Controls from simple stop-start up to fully integrated control system.

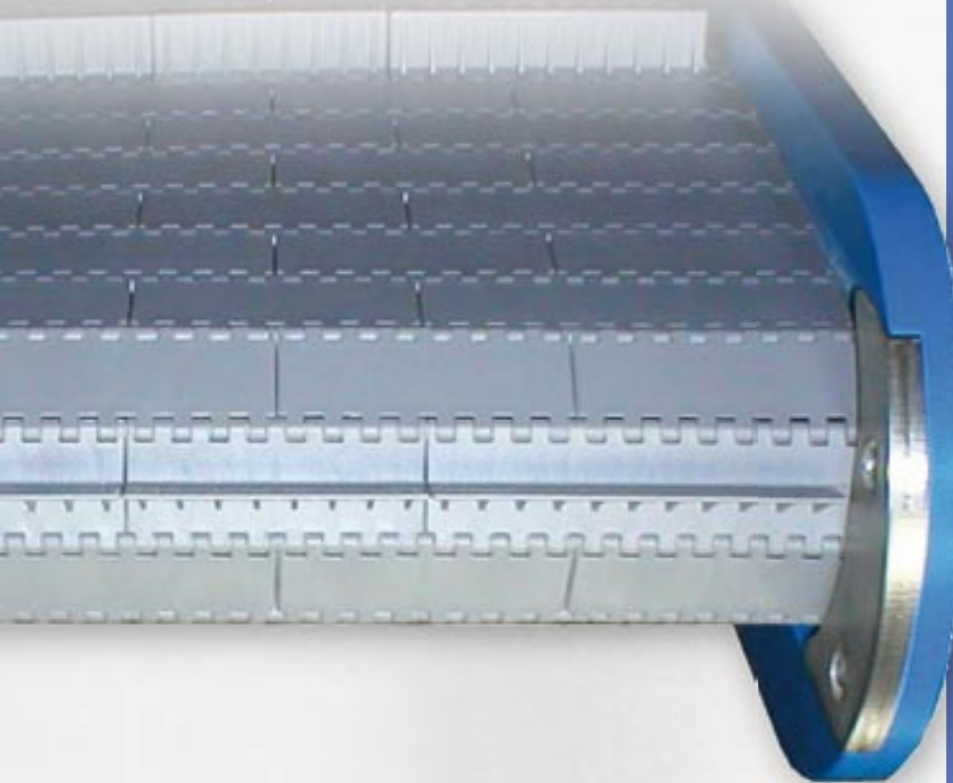

Wash down spec available including IP65 motors and controls.

Can be supplied on lockable castors for easy repositioning.

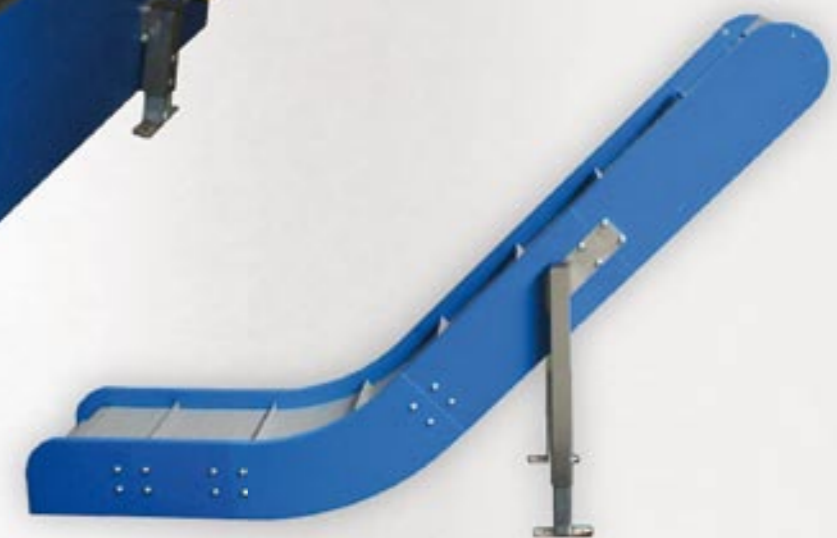

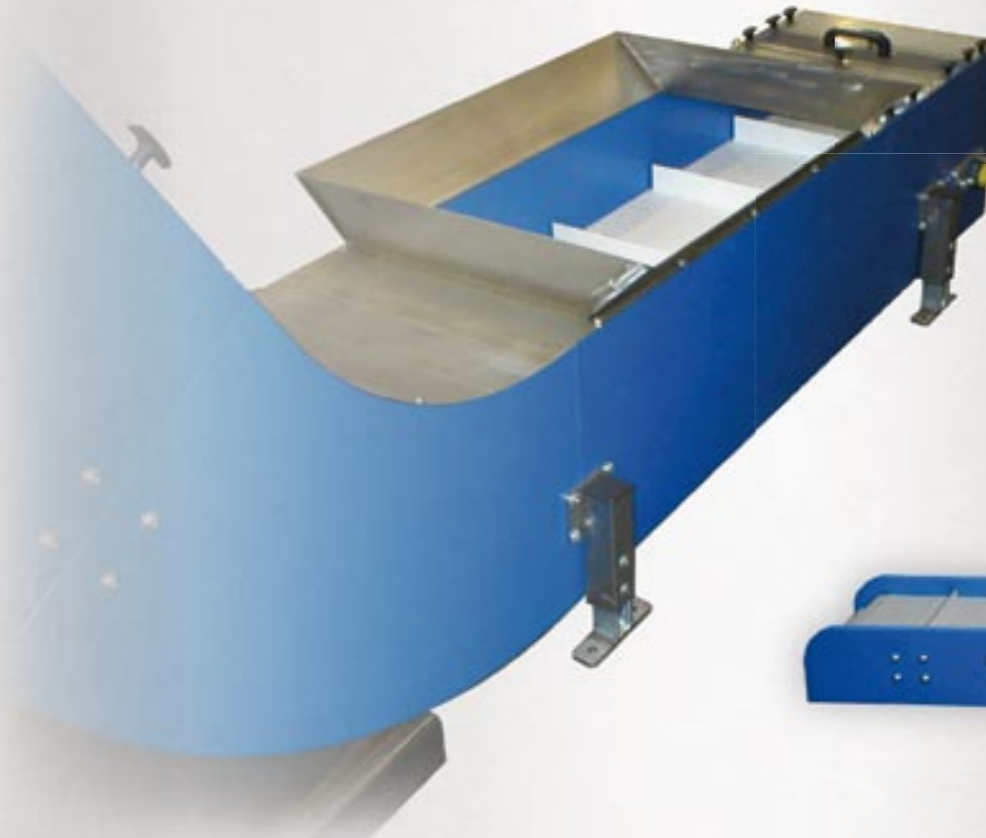

Belt can be covered or enclosed with the material of your choice.

Not only tough, the L.A.C. Conveyors range of Plastic Modular Conveyors are almost completely maintenance free.

If a belt needs to be removed for maintenance or cleaning, it is easily achieved with a minimum of downtime and without the need for special tools.

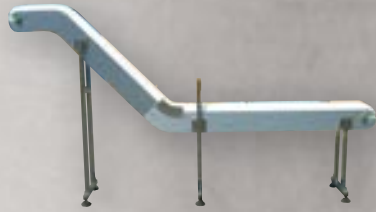

- An extremely versatile and cost-effective conveyor system
- Virtually indestructible construction using HMW Polyethylene
- Hygienic design
- Very low maintenance
- Built to order
- Support frame in stainless or mild steel
- Chemically inert - resistant to corrosion
